Subject: RE: TMDL resubmit comments and bacti calcs

So what does it mean to replace the letter but not the TMDL? This is getting confusing to me. Can you refer to the second transmittal letter by date? Or call it a second transmittal letter? Or a resubmittal?

Thanks Andrew. We will schedule a meeting with Christine soon to discuss any remaining questions or alternatives. With respect to use of the work 'replace' ... our thought is that it refers to the letter transmittal, rather than the TMDL itself. Without verbiage similar to replace, how do we know which transmittal letter to act on?

Chris –

My revisions are attached. To clean it up, I accepted all of your changes and deleted all previous comments. Only today's edits and comments are in track changes. Let me know what you think. I'm in today and tomorrow but out on Thursday and Friday.
Andrew

Hi Andrew,

A few additional thoughts following discussions with my management. Let's chat after you have reviewed responses and revisions. I am available most of today and tomorrow afternoon to follow-up.

Thank you,
Chris

Chris:

My tweaks, attached. I generally accepted your edits and deleted comment bubbles that got addressed. My comments are now in track changes. I think we're very close on the Deschutes

language, but perhaps not as close on the Budd Inlet language. While this probably isn't a big deal for this letter, we need to make sure we're on the same page for Budd. It seems like we're in very different spots for the rest-of-Puget-Sound and the Lake/freshwater pieces. How do we rectify this? Are you reviewing the notes that Leanne posts on the sharepoint site? Maybe we should recap last meeting's notes at each meeting to ensure we're on the same page. Or perhaps something else???

I'm in today until about 5 or 5:30, out tomorrow, and back all of next week.

Andrew

Subject: TMDL resubmit comments and bacteal calcs

Good Morning Andrew,

As I promised last week, please find attached a draft set of comments to the resubmit letter you kindly shared with us. These comments include the bacteria TMDL calculations as Attachment B. Please note that the enclosed comments are mine alone and as we discussed, my management is likely to provide input as well in the coming weeks. Thanks again for all the important work that you do and please let me know what else we can provide.

FYI, I am teleworking today and out of the office tomorrow. I can be reached today at (b) (6) if you would like to chat.

Best,

Chris
